Professional Summary

AI/ML and Full-Stack Software Engineer specializing in generative AI automation, multi-channel marketing engines, and enterprise data workflows. Built production AI campaign platforms and operational tools combining Next.js, TypeScript, Python (Flask), Gemini LLMs, Meta WhatsApp Business API (WABA), and automotive CRM analytics. Experienced in seed-grounded prompt pipelines, structured JSON schemas, client-side data streaming, and multi-tenant RBAC systems.

Experience

DaveAI — *AI / Full-Stack Software Engineer* **2026 – Present**

- Built the end-to-end campaign creation wizard (Next.js, TypeScript, Python/Flask) to generate voice call flows and WhatsApp marketing campaigns for car dealerships.
- Designed LLM prompts (Gemini) with structured JSON schemas and baseline seed templates to generate conversation steps, objection handling, and safety guardrails.
- Integrated Meta WhatsApp Business API (WABA) via RML and Airtel to create, validate, and bulk-submit interactive message templates with dynamic variables and CTAs.
- Built an automated translation pipeline for 11 Indian regional languages that keeps car specs and technical terms in English while localizing customer dialogue.
- Developed pre-sales and post-sales disposition sync tools (Syncer) to parse call transcripts, extract customer intent, and flag leads for dialer re-attempts.

MSsquare Technologies, Vishakhapatnam — *Business Growth Analyst* **Nov 2024 – Jan 2025**

- Analyzed business metrics, growth opportunities, and operational data to support data-driven decisions and process improvements.

Corizo, India — *Software Development Intern* **Feb 2024 – Mar 2024**

- Gained practical experience in full-stack technology implementation, API integration, and collaborative software development processes.

Virtual Internships & Job Simulations

Hewlett Packard Enterprise — *Software Engineering Job Simulation (Forage)* **Nov 2025**

- Completed HPE Software Engineering Job Simulation via Forage, gaining hands-on experience in enterprise software development practices, architecture patterns, and engineering workflows.

Accenture UK — *Developer and Technology Job Simulation (Forage)* **Nov 2025**

- Completed Developer and Technology simulation gaining exposure to SDLC. Conducted research on DevOps trends, built comparative analysis of Waterfall vs. Agile, and debugged Python logic issues.

JP Morgan Chase — *Software Engineering Job Simulation (Forage)* **Oct 2025**

- Completed JP Morgan Software Engineering simulation via Forage, focusing on financial technology solutions, interface integration, and software development best practices.

Technical Skills

Languages & Core: Python, TypeScript, JavaScript, SQL, HTML5/CSS3, Git, Linux, CI/CD

Frameworks & Backend: React, Next.js, Vite, Tailwind CSS, FastAPI, Flask, Node.js, REST APIs

AI & LLM Systems: Gemini API, Structured JSON Schemas, Prompt Engineering, Transcript Analytics, Classification

Data & Integrations: PostgreSQL, MySQL, SQLite, SheetJS/JSZip Data Pipelines, Meta WABA API, Webhooks

Projects

AutoNgage Syncer — *Automotive Operations & Lead Analytics Platform* **2026**

- Built a 7-tool browser operations platform (Next.js, TypeScript, SheetJS, JSZip, Chart.js) that reduced daily dealership lead preparation and CRM sync time from 50 minutes to under 5 minutes per batch.
- Pre/Post-Sales Sync:** Merged audience lists with call logs to parse dispositions, durations, and service milestones into standardized Zoho CRM tables.
- Qualitative BI Dashboard:** Developed an analytics dashboard combining Chart.js funnels with an LLM insight engine categorizing call transcripts across 9 automotive signals with verbatim lead quotes.
- Client-Side Audio Renamer:** Streamed remote audio recordings via ArrayBuffers and JSZip, renaming and packaging files by lead ID/phone in-browser without backend storage overhead.
- DMS Formatter & Re-Attempt Filter:** Standardized multi-dealer spreadsheets (Toyota, Mahindra, Honda) into dialer-ready batches while deduplicating multi-day call histories to generate clean callback pacing lists.

Friends Cafe — *Online Ordering System* **2025**

- Developed a full-stack ordering platform using Next.js, TypeScript, and MySQL with OTP authentication, inventory tracking, admin workflows, and REST APIs.
- Built reusable frontend components and backend routes for orders, menu management, and user workflows.

MindWell — *AI Mental Health Companion* **2025**

- Built an AI-first mental health platform using React and Flask with emotion intelligence across 11 categories, journaling, mood tracking, analytics, and safety-aware crisis helpline workflows.

Portfolio — Personal Engineering Website	2024 – Present
Designed and built a responsive engineering portfolio in React, TypeScript, and Tailwind CSS showcasing interactive system breakdowns, live production tools, and automated deployment pipelines.	
Education	
Lovely Professional University	2023 – 2025
Master of Computer Applications (MCA), Computer Science	
Acharya Institute of Graduate Studies	2020 – 2023
Bachelor of Computer Applications (BCA), Computer Science	
Kendriya Vidyalaya Rail Wheel Factory	2017 – 2019
12th Standard, PCMC (Physics, Chemistry, Mathematics, Computer Science)	
Certifications	
AWS Solutions Architecture Job Simulation — Forage	Nov 2025
Accenture UK Developer and Technology Job Simulation — Forage	Nov 2025
Citi Technology Software Development Job Simulation — Forage	Nov 2025
Hewlett Packard Enterprise Software Engineering Job Simulation — Forage	Nov 2025
J.P. Morgan Software Engineering Job Simulation — Forage	Oct 2025
Deloitte Australia Data Analytics Job Simulation — Forage	Nov 2025
Artificial Intelligence Analyst — Lovely Professional University	May 2025
Accelerating Deep Learning with GPU — Lovely Professional University	Apr 2025
Big Data Architecture — Lovely Professional University	Apr 2025
Business Intelligence — Lovely Professional University	Jan 2025
Data Science 101 — Lovely Professional University	Jan 2025
Data Visualization with Python — Lovely Professional University	Jan 2025
Machine Learning with Python — Lovely Professional University	Jan 2025
Complete Ethical Hacking Bootcamp 2022: Zero to Mastery — Udemy	Mar 2021
